SERVING NEW ENERGY DEMAND

Responsibly in Polk County

NOVEMBER 10, 2026

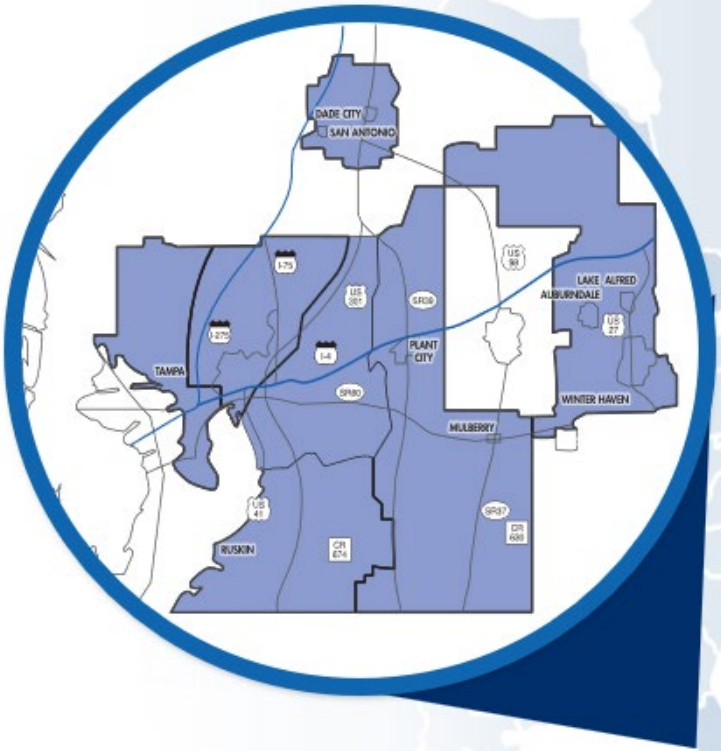

TECO® TAMPA ELECTRIC

CARLOS ALDAZABAL

Vice President, Energy Supply
Tampa Electric

Our role

Respond: We reply to developer inquiries. We don't recruit projects.

Evaluate: We assess feasibility, infrastructure, developer cost and timing.

Serve: We're obligated to serve projects that meet safety, reliability and government requirements.

TECO TAMPA ELECTRIC

Our Commitment to West Central Florida

As large-energy users consider our region, TECO's responsibility is clear: protect existing customers while planning responsibly for the future.

1. **Existing customers come first**

   Large-energy users will not increase other customers' costs.

2. **Reliable power will not be compromised**

   We'll only serve large-energy customers if we can also maintain reliable service for everyone.

3. **Growth will make the grid stronger**

   System investments will expand capacity, improve reliability and strengthen storm resilience.

4. **Today's growth will benefit tomorrow**

   Disciplined long-term investments support reliable power and help manage costs, delivering value over time.

TECO TAMPA ELECTRIC

Florida’s Large-Load Electric Service Law

Senate Bill 484 | Effective July 1, 2026

1	**50 MW threshold**	Applies to customers with anticipated peak demand of 50 MW or more at one location.
2	**Large-load tariffs**	Required investor-owned utilities to file tariffs describing how they’ll serve large-load customers.
3	**Customer cost protection**	Requires each large-load customer to cover the full cost of the electric service needed to serve it. Prevents costs and risks from shifting to other customers.

TECO TAMPA ELECTRIC

Tampa Electric's Large-Load Tariff

Data centers cover costs

They cover the power generation and system changes they need. They also contribute to broader system costs – which can help keep yours down.

Other customers protected

Risks aren't shifted, including if projects are cancelled, delayed or downsized.

Financial safeguards

Large-load customers provide security of $1 to $2 million per megawatt, plus monthly minimums and exit fees. Sign 20-year minimum contracts before electric service begins.

- ✓ Filed in September 2026
- ✓ Affirms our existing commitment
- ✓ Aligns with Florida law
- ✓ Provides strong customer protections

"There is ample evidence to conclude that this is the result of a good faith effort by TECO to get it right"

Walt Trierweiler, Florida Office of Public Counsel
